STUDY**

**PROJECT: DART SILVERLINE  
LOCATION: DALLAS, TX**

Building the future

ABET D

# DART SILVERLINE

## Dallas, Texas

**SECTOR:** Federal

**Scope of Work**  
ACM

**Challenges**  
Coordination across multiple locations and stakeholders

**Summary**  
As part of the DART rail system expansion, Auzmet worked on 12 separate stations located throughout the DFW metroplex. Each site required careful coordination with city and federal entities, and the design around electrical elements such as cove lights created additional complexity. The team's precision in field measuring and verification helped ensure smooth execution and high-quality results across all locations.

**Archer Western Herzog**  
General Contractor

**Jacobs Engineering Group, Inc**  
Architect of Record

**Patrick Stoddard**  
Auzmet Estimator
